# Introduction

This user guide contains step-by-step instructions on how to install and configure the Fortis Payments for NetSuite Application. This guide is broken down into three sections.

- 1. The **Fortis Payments for NetSuite Installation Guide** contains instructions to download, install and enable the Fortis Payments for NetSuite SuiteApp.
- 2. The **Fortis Payments for NetSuite Configuration Guide** contains instructions on how to configure the Fortis Payments for NetSuite SuiteApp.
- 3. The **Fortis Payments for NetSuite Feature Walkthrough** contains instructions on how to use the Fortis Payments for NetSuite SuiteApp to process payment transactions.

# Fortis Integration Support

For any issues or concerns regarding payment processing within your NetSuite product, our dedicated team of integration experts are here to review and address your concerns Monday to Friday, from 8am to 8pm EST.

#### Fortis Customer Service 855-465-9999

# Fortis Payments for NetSuite Installation Guide

#### 🚺 Important

Please check with your Fortis Client Rep that you have been provisioned access to the "Managed Bundle" prior to attempting the install.

# SuiteApp Prerequisites

The following features are required to be enabled in order to successfully install the SuiteApp.

- Payment Instruments
- Server SuiteScript
- Custom Records
- Credit Card Payments

#### 🚺 Important

These features can be enabled in NetSuite by Navigating to **Setup > Company > Enable Features**. Check with your NetSuite administrator to see if these features have already been enabled or required to be enabled in your NetSuite account.

# Install the Fortis Payments for NetSuite SuiteApp

- 1. Navigate to NetSuite home screen
- 2. Go to Customization > SuiteCloud Development > SuiteApp Marketplace

|          |    |            |              |   | 10.40     |                 |       |               |          |           |  |    |         |                 |       |

4. Click the Application card "Fortis Payments for NetSuite"

5. Click the Install button on the Fortis Application page

#### 6. Go to Customizations > Plugins > Manage Plug-ins

#### 7. Enable the "FORTIS Payments for NetSuite PLUG-IN" checkbox

8. Save the record

# Fortis Payments for NetSuite Configuration Guide

#### 🚺 Important

This section will be handled on your initial onboarding call with a Fortis representative.

### Obtain Fortis Credentials for NetSuite (Fortis Portal)

- 1. Navigate to the Fortis Portal located here https://portal.fortis.tech
- 2. Login to the portal credentials will be provided by the Fortis team
- 3. Navigate to User Management on the Menu
  - a. Click on the Name of the Primary User
  - b. Scroll down to the bottom and Enable Advanced Settings

- c. Click on Generate API Key
  - i. Copy and Paste the Key on a Notes App, it will need to be entered in on the next step in NetSuite

**Note:** Copy the ID in the top section should be copied and saved with the API key in a Notes App.

### Fortis Credentials Setup (NetSuite)

- 1. Login into your NetSuite account, navigate to your Netsuite home screen
- 2. Hover Setup > Fortis > Credentials, then click New

3. Enter a name for the record

| ORACL          | ∈<br>uite        | 罴               | Gill In        | ic.          |       |         |           | Search        |           |       |

# Create Payment Methods (NetSuite)

Users must set up a payment method and link it to the corresponding payment processing profile they wish to use for processing payments. If this is not done, it may result in NetSuite user configuration errors, or the payment processing profile may not be properly applied when saving transactions.

To setup a payment method in NetSuite to use with Fortis Payments Plugin, navigate to **Setup > Accounting > Accounting Lists** and set the filter to **"Payment Method"**.

#### 🚹 Note

The Fortis Payments for NetSuite Application supports the following Payment Methods, depending on your use case, each of these should be configured independently.

1. Payment Cards (Payment Card) - an online payment method for common card

processing. The method supports both Mail Order / Telephone Order (MOTO) and e-commerce payments.

- Payment Card Token (Payment Card Token) an online payment method for card processing with tokenization. The method processes tokens instead of payment cards.
- ACH Token (General Token) an online payment method that requires the Payment Instruments feature to be enabled. The method requires a token that was issued by a payment gateway and does not represent a payment card. The General Token payment instrument, only works with the General Token payment method.
- 4. **Pay by Reference (Pay by Reference)** an online payment method that requires the Payment Instruments feature. The method uses a reference issued by a payment gateway integration to perform a follow-up operation. Certain integrations do not share tokens, but can share a transaction reference.
- Fortis Paylinks (External Checkout) an online payment method used in E-Commerce. The shopper needs to be redirected to an external payment provider's page to authorize the payment.
- 6. ACH (ACH)
- 7. **Terminal (EMV)** an online payment method that is specific to the EMV Chip and PIN flow for point of sale (POS) solutions.

Creating a new payment Method (General Setup)

- 1) Click New on the Accounting Lists Screen
- 2) Give the Payment Method a Name
  - a) Some example naming conventions depending on the payment method you are setting up based on your company needs, refer to the list above for the supported payment methods

#### i) **Payment Cards Names:**

- (1) American Express
- (2) Discover
- (3) MasterCard
- (4) Visa

#### ii) **Payment Card Token Name:**

(1) Fortis Payment Card Token

#### iii) **ACH Token Name:**

(1) Fortis ACH Name:

#### iv) Pay By Reference: (1) Fortis Pay by Reference

#### **External Checkout Name:** V)

(1) Fortis PayLink

#### 3) Select the Payment Type

- a) The options are
  - i) EMV
  - ii) External Checkout
  - iii) **General Token**
  - iv) Offline
  - Pay By Reference V)
  - Payment Card vi)
  - vii) **Payment Token**

Select the payment type based on the payment method you are setting up, refer to the important note section above for reference.

#### 4) Requires Line-Level Data Checkbox

a) You do not need to check this box on the payment type, it will need to be checked on the Payment Processing Profile.

#### 5) Associated Payment Processing Profile

a) This field lists the merchant accounts that support this payment method.

# **fortis**

#### Note:

If you have not created the Fortis Payment Processing Profile yet, it will not appear on this list, but you can associate the newly created payment methods at the profile creation stage.

#### 6) Display in Website (Optional based on Payment Method)

a) Check this checkbox to use this payment method for a SuiteCommerce Website, or NetSuite's Payment Link feature.

#### Note:

You must also set up payment visuals for the Payment Method to show up in the SuiteCommerce website, SCIS and Payment Links.

For more information on the naming conventions for Payment Methods and the correct path for Payment Visuals please refer to the following Oracle NetSuite article - <u>https://docs.oracle.com/en/cloud/saas/netsuite/ns-online-help/section\_N1292421.html#bridgehead\_4291042820</u>

# Create Fortis Payment Processing Profile (NetSuite)

The Payment Processing Profile (PPP) found in NetSuite is the main configuration profile that links the profile back to Fortis Merchant Portal with the Fortis token you had generated in the very beginning of this guide.

# How to Set Up The Fortis Payment Processing Profile (PPP)

Creating the Payment Processing Profile (PPP)

1. Navigate to NetSuite Home Screen

2. Hover Setup > Accounting > Payment Processing Profile, then click New

# **Fortis** Fortis Payments for NetSuite User Guide

# Fortis Settlement Reconciliation Config (NetSuite)

The Fortis reconciliation configuration needs to be setup to reconcile the Fortis accounts back to NetSuite, if you have multiple Fortis merchant accounts that you need to reconcile you will need to create a separate configuration profile for each account.

1. Navigate to NetSuite home page

#### 2. Navigate to Setup > Fortis > Reconciliation Config > New

3. Select the Credentials to be used

| PRODUCT TRANSACTIO           |
|------------------------------|
| List Product Transa<br>Reset |
| TARGET START DATE            |
|                              |
| MEMO *                       |
|                              |

#### **Fortis Settlement Reconciliation Config**

4. Click "List Locations" to open a popup to select a location.

If only 1 location exists it will be selected automatically

| <b>Fortis Settle</b>                      | ment Reconciliation Config |                     |
|---|----------------------------|---------------------|

14. Save the Automated Invoice Payment Record created.

## Fortis Payments for NetSuite Feature Walkthrough

## Customer Registration with Fortis Payments for NetSuite

Customers that are created in NetSuite, are automatically synced to the Fortis Portal once a credit card transaction has occurred and are linked. If you would like to manually sync a profile, you can do so by pressing the "Sync Fortis Contact button".

1. Click the Sync Fortis Contact to sync the record manually to the Fortis portal

| NetSuite                                | Search                  |                     |                             |                | ۹                  |

## Payment Card Token Creation NetSuite

The following section will cover creating a payment token for a customer from within the NetSuite Customer record. When processing a transaction, if the location setup in your Fortis profile is under the location sharing group that supports tokenization, when you charge a regular payment card transaction it will automatically tokenize the card on the first transaction.

Below are the steps for adding a tokenized card from within the customer record in NetSuite if you would like to add the card to the account prior to doing a transaction.

1. Click "View" on the customer you will be adding a tokenized card for

| VIEW Customer | General | Customize View             | New Customer   |          |                    |           |   |

## Take Payments with SuiteCommerce

The first step in ensuring you can take payments with Fortis and SuitePayments is making sure the payment methods you want to support on the SuiteCommerce webstore are selected to display on the website.

The following payment methods are supported for SuiteCommerce & Fortis.

- Card Payments
- Card Token
- ACH
- ACH Token
- External Checkout (Only Sales)

## 🚺 Important

To use the External Checkout option with SuiteCommerce advanced, the PPP profile must have authorizations turned off — as only the sale operation is supported.

## Navigate to Payment Methods: **Setup > Accounting > Accounting Lists**

## 1. Click "Accounting"

Record an External Payment Event

If your payment event is recorded outside the NetSuite platform such as inside the Fortis portal for an example an authorization, and you want to now capture that payment in NetSuite you can do so on your Sales Order.

1. Choose the payment option for the customer.

- 3. Change the handling mode to Record an External Event

### 🚺 Important

Terminal does not support surcharge yet.

# Error Handling

When processing payments, a transaction may fail for various reasons, such as incorrect input data. In such cases, an error code will be displayed, accompanied by a "Payment Card Hold" warning or a different error message when the record is saved.

To see a more detailed log describing the reason for the transaction failure, you can view details of the payment event.

Logs of the Payment events can be access in NetSuite via the menu by navigating to **Transactions > Management > View Payment Events**.

1. Click "Transactions"

## 2. Click "View Payment Events"
