As a **Sage Preferred Tech Plus Partner**, Fortis provides a robust platform that meets the customers' payment needs as they grow. Customers can choose which components they need to run their business based on the complete stack of capabilities within the Fortis payments platform. Fortis can elegantly solve customer problems by enabling specific platform capabilities to uniquely build a solution.

Fortis enables Sage Intacct users to better manage their cash flow and optimize their operations. By introducing features like recurring payments and customer sync, we help Intacct users streamline back-office processes, allowing them to focus more on driving their business forward.
